RAMDAYAL PATEL

Full-Stack MERN Developer

Pune, India | +91-9005976380 | ramdayal45120@gmail.com
LinkedIn: linkedin.com/in/ramdayal-patel | GitHub: github.com/Ramdayal45Patel

PROFESSIONAL SUMMARY

Full-Stack MERN Developer with 4+ years of experience building healthcare and subscription platforms using React.js, Node.js, Express.js, TypeScript, MongoDB, and MySQL/PostgreSQL. Delivered 20+ production REST APIs with JWT/AWS Cognito authentication, PayPal/Razorpay payments, RabbitMQ event processing, and AWS cloud services (S3, SNS, SES). Strong in Redux/RTK Query, Material UI, unit testing (Jest/Mocha, 80%+ backend coverage), and CI/CD (CircleCI, Docker, Kubernetes). Uses AI-assisted development tools (Cursor, GitHub Copilot, Claude) to accelerate coding, test generation, refactoring, and debugging while owning architecture, code reviews, security, and production quality. Proven in root-cause analysis, mentoring developers, and shipping production-ready features in Agile teams.

Languages: English — Professional working proficiency (written & spoken)

TECHNICAL SKILLS

- **MERN & Full-Stack:** MongoDB, Mongoose, Express.js, React.js, Node.js, JavaScript (ES6+), TypeScript, RESTful APIs, LoopBack, Microservices Architecture
- **Frontend:** React.js, Redux, RTK Query, Material UI, HTML5, CSS3, Bootstrap, Webpack, Responsive UI, Reusable Component Design
- **Backend & Integration:** JWT, AWS Cognito, Keycloak, RBAC, Webhooks, RabbitMQ, PayPal, Razorpay, TaxJar, Axios
- **Databases:** MongoDB, MySQL, PostgreSQL, Sequelize ORM, Mongoose ODM, Dual-Database Architecture, Complex Data Modeling
- **Cloud & DevOps:** AWS (S3, SNS, SES, Cognito), Docker, Kubernetes, CircleCI, Git, GitHub
- **Testing & Quality:** Jest, Mocha, Chai, TDD, Unit & Integration Testing, Code Reviews, 80%+ Backend Test Coverage
- **AI-Assisted Development:** Cursor, GitHub Copilot, Claude — accelerated development, test generation, refactoring, API design, and debugging with full ownership of architecture and production outcomes
- **Tools & Methods:** Jira, Confluence, Agile/Scrum, Linux, Ubuntu, Puppeteer, Winston Logging

PROFESSIONAL EXPERIENCE

EdgeVerve Systems Limited (Finacle - Infosys) | Core Banking Solutions | Product Developer
Pune, India | March 2025 – Present

- Deliver full-stack features across React.js front-end and Node.js/Express.js back-end with PostgreSQL for enterprise product releases.
- Upgraded and stabilized UI on the Finux framework (React + Angular), fixing recurring production UI defects and improving application performance.
- Built and maintained REST APIs using Node.js, Express.js, and LoopBack for reliable React-to-PostgreSQL integration.
- Expanded Mocha-based unit test coverage on Node.js modules to improve release confidence and reduce regression risk.
- Performed root-cause analysis on complex React + Node.js + PostgreSQL issues; delivered durable fixes for performance bottlenecks and integration failures.
- Mentored junior developers on React, Node.js, and PostgreSQL patterns; reviewed code and unblocked critical delivery tasks.

InnoBit Systems | Member of Technical Staff
Noida, India | January 2022 – February 2025

- Designed and built 20+ RESTful APIs in Node.js, Express.js, and TypeScript for user management, subscriptions, payments, and healthcare modules.
- Developed production-grade React.js UIs with Redux, RTK Query, TypeScript, and Material UI, including reusable components and forms shared across product modules.

- Implemented JWT- and AWS Cognito–based authentication with RBAC (Sequelize/MySQL), supporting subscribers, beneficiaries, and admins.
- Managed dual-database architecture: Sequelize ORM (MySQL) for relational data and Mongoose ODM (MongoDB) for document-based health records.
- Integrated PayPal, TaxJar, AWS S3/SNS/SES, Cognito, and MSG91 for billing, notifications, storage, and auth; built webhook handlers for payment status sync.
- Automated async workflows with RabbitMQ, webhooks, and cron jobs for health report access, alerts, and background processing.
- Deployed via CircleCI, Docker, and AWS; maintained 80%+ unit test coverage on Node.js modules using Jest, Mocha, and Chai.
- Followed TDD practices to validate API business logic and frontend-backend contracts in Agile delivery with Jira and Confluence.

PROJECTS

Family Pro-Health — Healthcare Subscription Platform

Stack: Node.js, Express.js, TypeScript, React.js, Material UI, MongoDB, MySQL, JWT, AWS Cognito, S3/SNS/SES, RabbitMQ, PayPal, TaxJar, Puppeteer, Jest

- Built a modular backend with 15+ domain services (users, subscriptions, payments, orders, devices, biometrics, alerts, notifications).
- Built APIs for subscription management, biometric device data, family health records, and secure multi-user report sharing.
- Integrated PayPal and TaxJar with webhook handlers for payment and tax status sync across web, mobile, and backend systems.
- Implemented RabbitMQ and AWS SNS/webhooks for async notifications, audit logging, and real-time health record updates.
- Delivered User Scorecard dashboard in React.js and Material UI for task completion and engagement tracking.

Astikan HealthCare — Healthcare Services Platform

Stack: Node.js, Express.js, TypeScript, MySQL, JWT, AWS S3/SES/SNS, Mocha, Chai | March 2022 – December 2023

- Built user module and application framework from scratch for a multi-service healthcare platform.
- Delivered backend services for bank management, lab tests, health insurance, and health loans with third-party integrations.
- Implemented teleconsultation and online lab test booking flows; designed individual and family subscription plans with insurance options.

EDUCATION

Master of Computer Applications (MCA) | CGPA: 8.5/10

Ajay Kumar Garg Engineering College, Ghaziabad, Uttar Pradesh | 2019 – 2022
